SKILLS

Programming & Analysis: Python, R, Java, C++, C, Core Java

Data Libraries: NumPy, Pandas, Matplotlib, TensorFlow

Tools/Platforms: MySQL, Tableau, Apache Hadoop, Hive

Web & Frameworks: Flask, HTML, CSS, Bootstrap

Soft Skills: Problem-Solving, Teamwork, Adaptability, Quick Learner

PROJECTS

Stock Management SystemMay 2024 - Jul 2024

- Developed a **stock management application** that allows users to manage inventory, track sales, and **generate reports**. The application uses NumPy for numerical computations, Pandas for **data manipulation**, and **Matplotlib/Seaborn for data visualization**
- Designed interactive dashboards using graphs and charts to visualize stock trends, sales patterns, and inventory levels.
- Utilized Pandas for data manipulation tasks and NumPy for numerical computations to ensure accurate reporting and analysis.

Large Language Model (LLM) Interaction InterfaceJul 2024 - Aug 2024

- Created an interactive interface utilizing a **Large Language Model (LLM)** to handle natural language queries in a data analysis context.
- Integrated **Hugging Face Transformers** for question-answering capabilities, enabling users to extract insights from datasets using natural language queries.

Sales Analytic DashboardOct 2024 - Nov 2024

- Improved a **web-based sales analytics dashboard** that enables businesses to analyze sales data, monitor performance metrics, and visualize trends over time. The application provides interactive tools to help stakeholders gain deeper insights into sales patterns.
- Experienced in developing web applications using Flask and managing databases with SQLite/MySQL; proficient in front-end technologies, including **HTML, CSS, and Bootstrap**, for creating responsive user interfaces. Provided interactive charts and graphs for stakeholder decision-making.

Summer Training

Lpu| Data Visualization and AnalyticsJun 2024 – Jul 2024

- Gained hands-on experience in **data visualization techniques** and analytics workflows.
- Built expertise in presenting insights, performing statistical analysis, and creating interactive dashboards.
- Enhanced technical skills, analytical thinking, and teamwork through practical exercises.

CERTIFICATES

Data Visualization Using Python |[Lpu](#)Oct 2024

Data Structures and Algorithms |[Coursera](#)Apr 2024

ChatGPT Advanced Analysis |[Coursera](#)Apr 2024

SQL for Data Science| [Great Learning](#)Apr 2024

Achievements

Participated in multiple hackathons, applying **Python, SQL, and data visualization** to solve real-world problems under tight deadlines.

Collaborated in team-based competitive environments, enhancing **analytical thinking, problem-solving, and rapid prototyping** skills.

EDUCATION

Lovely Professional UniversityPhagwara, Punjab
Bachelor of TechnologyPursuing
Computer Science and Engineering; CGPA: 6.8

Sri Viswa Junior CollegeVisakhapatnam, A.P
IntermediateJun 2020 – May 2022
Percentage: 87%

Abhyas SchoolGarividi, A.P
MatriculationMar 2019– May 2020
Percentage: 91%
